PROFESSIONAL SUMMARY

Data Science & AI student at IIT Madras and Techno India University with hands-on experience in Python, Machine Learning, Deep Learning, Web Development, and Prompt Engineering. Passionate about applying AI to Health Tech and Astronomy. Competitive hackathon finalist (top 10 at IIT KGP, 650+ teams) with published research in mathematics and a strong track record in entrepreneurship and campus leadership.

EDUCATION

Indian Institute of Technology (IIT), Madras
BS in Data Science and Applications

Chennai, Tamil Nadu, India
Jan 2025 – 2029

Techno India University
B.Tech in Computer Science Engineering – AI & ML Specialization

Kolkata, West Bengal, India
2025 – 2029

TECHNICAL SKILLS

Languages: Python, C, Java, JavaScript, SQL, HTML, CSS, Node.js

AI, ML & Data Science: Machine Learning & Algorithms, Deep Learning (ANN, CNN, RNN foundations), Jupyter Notebook, rPPG, OpenCV, Pandas, NumPy

Prompt Engineering: LLM prompt design, zero/few-shot prompting, chain-of-thought, system prompt optimization

Tools & Platforms: Linux, Git, GitHub, VS Code

Domains: Data Science, ML in Astronomy, Health Tech AI, Web Development

Soft Skills: Leadership, Team Building, Cross-functional Collaboration, Problem Solving, Public Speaking, Entrepreneurial Thinking

PROJECTS

ML Models for Stellar Luminosity, Exoplanet Detection & M5 Solar Flare Prediction | Python, Machine Learning, Astronomy

- Built ML models to predict stellar luminosity, detect the presence of planets near stars, and predict M5-class solar flares.

Crop Yield Prediction & Boston House Price Prediction | Python, Machine Learning

- Built regression models to predict crop yield and Boston housing prices from structured datasets.

Jarvis | Python, AI, Automation

- Built a personal AI assistant capable of understanding voice commands and automating everyday tasks.

AI Automatic Chatbot to Reply to WhatsApp Text | Python, NLP, Automation

- Developed a chatbot that automatically replies to WhatsApp texts using AI-driven natural language responses.

Multiple Web Applications | HTML, CSS, JavaScript

- Designed and deployed numerous websites, including a digital queue system, student mental health tracker, AI news summarizer dashboard, personal diary/portfolio site, digital planner, college websites, habit tracker, a Minesweeper game, and other web projects.

Contactless Heart Rate Detection (rPPG) | Python, OpenCV, AI, Health Tech — built as a team project at a hackathon

- Built a contactless BPM detection system using facial scanning and remote photoplethysmography (rPPG).
- Analyzed subtle color changes in facial skin caused by blood flow to estimate real-time heart rate without physical sensors; applicable to telemedicine pipelines.

ACHIEVEMENTS & AWARDS

Top 5 – GDG Cloud Kolkata	2026
Top 10 – Entrepreneurship Event, IIT Kharagpur	2026
Top 15 – PromptWars Hackathon, Hack2Skill, Techno India University	2026
Rank 28 of 256 Teams – Techathon 3.0, West Bengal	2026
Finalist (650+ teams) – Kalyani University Hackathon	2026
Finalist – Hackathon, IIT Kharagpur	2026
Top 12 – Hult Prize (College Round)	2026
Selected – International Research Hackathon, NSRI	2026
Mathematics Essay Published – Tom Rocks Maths (Oxford)	2025

LEADERSHIP & CAMPUS INVOLVEMENT

- Campus Ambassador – IIT Kharagpur Tech Fest 2026
- Campus Ambassador – IIT Bombay E-Cell
- Campus Ambassador – IIT Bombay Techfest

ADDITIONAL INFORMATION

Languages Spoken: English (Fluent), Hindi (Fluent), Bengali (Fluent)

Currently Learning: Linux Systems Administration, Cybersecurity Fundamentals, Advanced Python for Data Science

Interests: Artificial Intelligence, Health Technology, Space Technology, Applied Mathematics, Cybersecurity
